## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 18-20 and 39 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 14, 15, 19, 20, 31-33 of U.S. Patent No. 7005049. Although the conflicting claims are not identical, they are not patentably distinct from each other because even though the patent does not disclose a chamber in the application, it would appear that a chamber would inherently have to be there or one would not be able to pressurize the electrolyte solution and therefore the chamber would be an obvious variation.

The examiner in charge of this application upon researching the instant claims has found another patent by the applicants which is used above in the ODP rejection.

The examiner would like to apologize for indicating the allowable subject matter in the previous office action, since the newly found art by applicant should have been found prior to indicating that the instant claims were allowable.

***Allowable Subject Matter***

3. Claims 3, 6-17, 21, 23-38, 40-42 are allowable over the prior art of record.
4. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach and/or suggest the instant claims as set forth in each of the amended independent claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.
